PROFESSIONAL EXPERIENCE

Aloha Technology Pvt Ltd | Pune, India — April 2022 – Present

Software Developer

Developed and maintained web applications and custom CMS solutions for US clients across analytics, credit-union document workflows, cinema ticketing, event distribution, and digital publishing. Implemented PHP/Laravel functionality, REST API integrations, MySQL queries, and responsive interfaces. Took on Senior Frontend and Senior Full Stack project responsibilities, including code reviews, refactoring, client discussions, and release demonstrations.

KEY PROJECTS

Business Intelligence & Real-Time Analytics Dashboards | Senior Full Stack Developer

Digital experience analytics client | JavaScript, Highcharts JS, PHP, Jira API, Slack Webhooks

- Developed 10–15 analytics dashboard pages with 10–20 Highcharts visualizations per page, supporting date, device, page, and time-period filters.
- Optimized payload rendering and query caching to display 2–3 years of historical data across 20+ Highcharts visualizations without UI blocking.
- Integrated Jira APIs and webhooks to create tickets and synchronize data bidirectionally between platform modules and Jira.
- Integrated Slack webhooks to share AI-generated fix recommendations with client teams.
- Reviewed peer pull requests, refactored legacy PHP/JS modules to reduce technical debt, and led post-release feature demos.

Secure Document Vault & Workflow Platform | Senior Frontend Developer

Credit-union e-document management platform | PHP, JavaScript (ES6+), jQuery, AJAX, Bootstrap

- Developed responsive frontend modules for a credit-union document platform supporting electronic signatures, check sending, and document storage.
- Implemented browser-based PDF editing functionality for document preparation and signing workflows.
- Implemented client-side AES encryption for sensitive data and audit-trail payloads before transmission to the server.

Enterprise Box Office & Transactional Engine | Full-Stack Developer

Cinema ticketing and concessions platform | PHP (Laravel), Blade, JavaScript, Tailwind CSS

- Built seat-selection and ticket-booking interfaces using Laravel Blade, JavaScript, and Tailwind CSS, with real-time seat-availability updates.
- Integrated Google reCAPTCHA into the booking workflow to help mitigate automated submissions.
- Added Google and Apple Calendar integration so customers could save purchased screenings to their calendars.
- Added Google Wallet and Apple Wallet functionality so customers could save purchased tickets to their wallets.

Agricultural Content Publishing Platform | **Frontend Developer**

Digital publishing platform | PHP, WordPress, MySQL, AJAX

- Developed a WordPress publishing website using a custom theme, custom post types, and reusable shortcodes.
- Built article templates and category navigation for agricultural news, research, community content, and farm operations.
- Created an archive posts page for browsing past publication editions and integrated an embedded PDF viewer.
- Developed a videos page with custom post types and custom metaboxes with an integrated YouTube video player.
- Added WordPress admin settings to enable non-technical editors to manage website content.
- Completed the assigned development scope within one month.

Multi-Site Event Synchronization & CMS Automation | **Software Developer**

Event ticketing platform | PHP, WordPress, MySQL, AJAX

- Engineered a fault-tolerant WordPress cron synchronization plugin polling REST APIs every 10 minutes across 400+ venue sites, eliminating manual event entry.
- Stored synchronized event and ticket data in custom post types and displayed it through configurable frontend pages.
- Developed AJAX-powered search, multi-filter navigation, and pagination for event listings.
- Created 4–5 custom shortcode widgets and Elementor-based pages for configurable content presentation.

PERSONAL PROJECTS

TaskPad | *Laravel 12, MySQL, Sanctum, React, TypeScript* | API | UI

Jira-style project tracker with boards, sprints, issues, and comments; Laravel REST API and React UI.

TimeSheet | *PHP 8, Eloquent ORM, MySQL, JavaScript* | GitHub | Live Demo

Time-tracking web app for a small organization with role-based access, persistent timer, reports, and CSV export.

MediaHUB (AI-Agent Assisted) | *Go, JavaScript, Tailwind CSS* | API | UI

Self-hosted media streaming app with JWT login, private photo and document vaults, video streaming, and music playlists, built with AI coding agents.

EDUCATION

Master of Computer Applications (MCA) | College of Engineering Bhubaneswar, Odisha, India 2020 – 2022

CGPA: 8.93 / 10.0
